

NEHA PANDE

Full-Stack Engineer · React · TypeScript · Python · GenAI · ASP.NET Core · System Design

+91 83298 29466 | pandeneha99@gmail.com | [linkedin.com/in/neha-pande](https://www.linkedin.com/in/neha-pande) | github.com/nehapande09 | Pune, Maharashtra

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1+ year of production experience building scalable web applications using React.js, TypeScript, Python, and REST APIs. Skilled in Generative AI integration, prompt engineering, LangChain, and RAG-based architectures. Experienced in backend development with Python (Flask) and ASP.NET Core / C#, with strong understanding of networking fundamentals, API design, and system design principles. Proven ability to deliver end-to-end features in Agile teams with exposure to Azure, CI/CD pipelines, and SQL Server environments.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Component Architecture, State Management
Backend: Python, Flask, ASP.NET Core, C#, Node.js (fundamentals) | REST API Design, DTO Patterns, MVC
AI / GenAI: Generative AI, Prompt Engineering, LangChain, RAG, Claude API, OpenAI API, MCP, Agent Design
System Design: Networking Fundamentals, API Architecture, Microservices Concepts, CI/CD, System Scalability
Databases & Cloud: Microsoft SQL Server, SQL, MongoDB | Azure (AZ-900), AWS (CCP), Jenkins, GitHub, Postman

PROFESSIONAL EXPERIENCE

Software Engineer — Full Stack | Haptiq Pvt. Ltd., Pune

Jul 2025 – Present

- Built production React.js + TypeScript features end-to-end — component architecture, REST API integration, state management, and deployment.
- Designed RESTful APIs with DTO patterns and networking abstractions; applied system design thinking across frontend-backend boundaries.
- Integrated Claude API with structured prompt engineering to automate code review, debugging, and AI-assisted feature development.
- Prototyped LangChain + RAG pipelines and evaluated GenAI integrations (OpenAI API, embeddings) for the product roadmap.
- Collaborated on Python Flask and ASP.NET Core / C# back-end modules; gained cross-stack exposure to .NET architecture patterns.

PROFESSIONAL PROJECTS

GoPlus – SafeMark Inc. — React, TypeScript, ASP.NET Core, C#, SQL Server, Azure, REST APIs

- Developed frontend features for a rental platform (e-bikes, scooters, subscriptions); built REST API integrations with DTO and MVC patterns.
- Collaborated with backend team on ASP.NET Core / C# modules; applied system design knowledge across service boundaries and data flows.
- Used SQL Server for data handling; worked within Azure DevOps, Postman, GitHub, and Agile sprint workflows.

Daily Racing Form (DRF) — TypeScript, JavaScript, REST APIs, SQL, Jenkins, Git

- Built and maintained UI components for a high-traffic racing application; integrated REST APIs and optimised frontend rendering performance.
- Gained hands-on exposure to DTO patterns and layered backend architecture; contributed within Jenkins-based CI/CD pipelines.

COLLEGE PROJECTS

VeriFact – AI-Based Fact Checking Platform — Python, Flask, React, ML/RNN, LangChain, News API

- Built an end-to-end GenAI-powered fact verification system — Python Flask backend, RNN + ML models, REST APIs, React UI with confidence scores.
- Applied prompt engineering and API orchestration to chain News API and Wikipedia into a unified AI inference pipeline.

Family Wallet — Android, Firebase

- Collaborative expense tracker with Firebase real-time sync, multi-user budget management, and live spending analytics across devices.

CERTIFICATIONS

Anthropic (May 2026): MCP Advanced + Intro · Agent Skills · Claude Code in Action + 101 · AI Fluency Framework & Foundations
Microsoft Azure Fundamentals AZ-900 | AWS Cloud Practitioner Essentials

EDUCATION

MCA — Master of Computer Applications | IICMR, Savitribai Phule Pune University | CGPA: 8.04 2023 – 2025

B.Sc. Computer Science | MIT College of CS & IT, SRTMU Nanded | CGPA: 9.68 · 3rd Rank · Student of the Year 2019 – 2022
